

# RECREATIONS

ANDROS ZINS-BROWNE

## GENERAL TECHNICAL INFORMATION

piece name: recreations

performed by: Andros Zins-Browne, ...

duration: approx. 17 minutes

set requirements: (provided by theatre )

- clean open stage, no backdrop, sides or borders.

- grey or black dance vinyl

- 1 folding table, metal or wood, ( measures: see attached diagram, & DVD)

that can be mounted in a freestanding position at a approx.45°angle to be used as a slide for performers.

(smooth surface, should be able to support 70Kg) .

- 3 inflatable exercise balls of varying colours, 65 cm diameter.

Comments: if impossible to find props, please arrange for transportation to theatre and back from PARTS .

light: (provided by theatre )

Double general front and backlight wash covering the entire playing surface,

Frontlight : min. 3 rows of 2X5 PC 1KW per row (5 PC's NO COLOUR(NC), 5PC's LEE 201)

Backlight : 3 rows of 2X5 PC or fresnel 1KW per row (5 PC's NO COLOUR, 5PC's LEE 201)

Left to right position per row :

NC / 201	NC /201	NC / 201 (center)	NC / 201	NC / 201
----------	---------	----------------------	----------	----------

( patched : center spots single, outer two spots of same colour together.)

General mood description :

the idea of the light design is one of very slow "seasonal mood changes", suggesting a subtle and random passing of cloudformations, almost unnoticeable transitions from warm to cold general light and back.

## Programmation :

A chaser of 13 scenes

scene 1: general no colour (GNC) on full. / scene 2: GNC + 201 lights on right side of all pipes front & back to full. / scene3 : same as scene 2 + all center 201 spots to full. / scene 4: same as previous scene + dim all NC spots on right side of all pipes to zero. / scene 5 : same as previous scene + all lefthand side 201 spots to full + dim all center NC spots to zero. / ... this is from right side to left , then, same procedure from front to back ... / scene 6 : same as previous scene + all NC spots of first frontlight pipe to full. / scene 7 : same as previous scene + all NC spots of 2nd frontlight pipe to full. / scene 8 : same as previous scene + all NC spots of 3rd frontlight pipe to full + dim all NC spots on 1st frontlight pipe to zero. / scene 9 : same as previous + dim all NC spots of 2nd frontlight pipe to zero + add all 201 spots of 1st frontlight pipe to full. /

scene 10 : same as previous + add all 201 spots of 2nd frontlight pipe to full + add all NC spots of first frontlight pipe to full. / scene 11 : same as previous + add all 201 spots of first backlight pipe to full +

dim all NC spots of 3rd frontlight pipe to zero. / scene 12 : same as previous + add all 201 spots of 2nd backlight pipe to full + dim all NC spots of 3rd frontlight pipe to zero. / scene 13 : same as previous + add all 201 spots of last backlight pipe to full + dim all NC spots of first backlight pipe to zero... then it starts back from scene 1.

All crossfades between scenes of 45 seconds.
